Editors' choice
205 Highlights from this issue
P Smith and G Fuller

Editorial
206 Encephalitis: help from guidelines
N W S Davies, F Sanderson

What to do when
209 A practical guide to the treatment of neuromyelitis optica
J Palace, I Leite, A Jacob

Reviews
215 Myoclonus: a pragmatic approach
D Lozsadi

Neuroimaging
225 Normal anatomy of the brain on CT and MRI with a few normal variants
S Renowden

A difficult case
234 Successful outcome of Epstein–Barr virus encephalitis managed with bilateral craniectomy, corticosteroids and acyclovir
E Hayton, B Wakerley, I CJW Bowler, M Bogdanovic, J E Adcock

Neurological rarities
238 Acute cerebellar ataxia due to Epstein–Barr virus
C L McCarthy, P McColgan, P Martin

What neurologists need to know
241 How to do it: How to get the most out of cerebrospinal fluid cytology
P Milburn-McNulty, B Michael, N Moxham, N Fletcher, D Crooks

Contemporary neurological dilemmas
244 Lesley's story: a case report, and discussion of challenges faced in end-of-life care for progressive neurological disease
P Foley, J Hampton, A Hampton, R Hampton, D Oleksy, D Oliver, B J Weller

Neurological letter from
249 Letter from the antipodes
R W Frith

Test yourself
253 Recurrent sensory and motor neuropathy
F Geranmayeh, J Pritchard, J C Janssen

Images of the moment
257 Widespread intracerebral metastases from prostate adenocarcinoma
D D Mackay, E L Diamond, J P Klein

263 Susac's syndrome
H H Ramadan, M Vinjam, J Macmullen-Price, A Hassan

Commentary
261 Medicine 2, Alternative Medicine 1: a commentary on Dr Stern's paper
J Stone, A Carson

266 Commentary on Susac article
P Enevoldson

From the retired
259 Medicine 0–Alternative medicine 1
G Stern

Letter to the editor
268 Blood films in the investigation of chorea
J Alawneh, M R Baker, G R Young

The history of neurology
269 The optic papilla ('inny' or 'outy') and the origins of papilloedema
L Bennetto, G T Plant

Letter
271 We MUST not call it MUS
P Goldsmith

A paper, book, or conversation that changed my practice
272 Towards safer waters: sharks out, swimmers in
P Morrish

Carphology
274 Carphology by A Fo Ben

Miscellaneous
265 Corrections

Cover image Eastern equine encephalitis virus. Coloured transmission electron micrograph (TEM) of eastern equine encephalitis (EEE) virus particles (Alphavirus sp., yellow) in the salivary gland of a mosquito. The virus is an arbovirus (arthropod-borne virus) and is transmitted to humans, birds, and horses through the bite of an infected mosquito.
