Mehta AR, Kennard C. The pharmacological treatment of acquired nystagmus (*Pract Neurol* 2012;12:147–53). There is a grammatical error in the first line of the abstract. Currently, the abstract is written as follows: “Nystagmus may have a significantly impact on health...” The correct wording should be “Nystagmus may have a significant impact on health...” This error was introduced by the journal production team and we apologise for any confusion caused.
