

Editor's choice

- 269** Highlights from this issue

Editorial

- 270** Neurologists and the 'doctors with desks' fallacy
G N Fuller

Reviews

- 272** Stiff person syndrome
S Hadavi, A J Noyce, R D Leslie, G Giovannoni
- 283** Teleneurology: an overview of current status
A J Larner
- 289** Dermatological clues to neurological diagnoses
K L Warburton, B Wakerley

Neurological rarities

- 296** A neurological rarity not to be missed: cerebrotendinous xanthomatosis
M Rafiq, N Sharrack, P J Shaw, M Hadjivassiliou

How to do it

- 301** Pathergy test
M R Baker, E V Smith, O A Seidi
- 303** Testing the neuromuscular junction: what neurophysiology can offer the neurologist
R G Whittaker

Image of the moment

- 308** Cavernous sinus syndrome with pachymeningitis
M Sabah, B O Olubaniyi, A D Spiers, N J Gutowski

What got me into neurology

- 310** How I became a neurologist
J Walton

Neurological history

- 312** The world's best known neurologist?
G Stern
- 316** Parkinson's facies
M Lawden

Me and my neurological illness

- 317** Dealing with the unexpected
J Waters

Test yourself

- 319** Ataxia in a young patient
J Stevens, J G Llewelyn, A M R Taylor, N W Wood

Neurological letter from

- 323** Tunis, Tunisia
K Makhoulouf

Letters to the editor

- 326** Set a good example: use your stethoscope appropriately
J I G Strang
- 328** The Neurological Grand Round: room for updating?
M Cossburn
- 329** 'Wither grand rounds?'
G Stern

Carphology

- 330** Carphology by A Fo Ben

Cover image Parkinson's disease. Fluorescent deconvolution micrograph of a section through a brain affected by Parkinson's disease. Neuron (nerve cell) nuclei are blue. The protein alpha-synuclein is red. It is thought that it is the accumulation of this protein which causes the progressive degeneration of the neurons that leads to the symptoms of Parkinson's disease.
