

Editor's choice

- 331** Highlights from this issue
P Smith, G Fuller

Reviews

- 332** Ptosis
K Ahmad, M Wright, C J Lueck
- 341** Tardive movement disorders: a practical approach
T A Saifee, M J Edwards

Neurological rarities

- 349** CLIPPERS: Chronic Lymphocytic Inflammation with Pontine Perivascular Enhancement Responsive to Steroids
D Biotti, R Deschamps, E Shotar, E Maillart, M Obadia, I Mari, J Savatovsky, O Gout
- 352** An unusual cause of carpal tunnel syndrome
J Kowalewska-Zietek, T P Dawson, D Damodaran, J D Gillmore

How to do it

- 355** Seronegative limbic encephalitis: case report, literature review and proposed treatment algorithm
S A Bazir Ahmad, H A Archer, C M Rice, S Gerhand, M Bradley, A Wilkins

Test yourself

- 362** Gesundheit! Sneezing, paraesthesiae and ataxia in a 35-year-old man
V Stokes, W Küker, U G Schulz

The history of neurology

- 366** General paralysis of the insane
K Waddington, R Thomas, M Willis

Me and my neurological illness

- 370** It's just petit mal: she'll grow out of it
F Gibbon

Neurological letter from...

- 372** Stroke thrombolysis in Mombasa—an outreach service
D Cohen

Commentary on the Neurological letter from Mombasa

- 375** SODUKO
T Hughes

Second opinion

- 376** How healthy is UK neurology? A personal perspective
F Schon

Image of the moment

- 378** MS: the big knit
H Hope

Letters

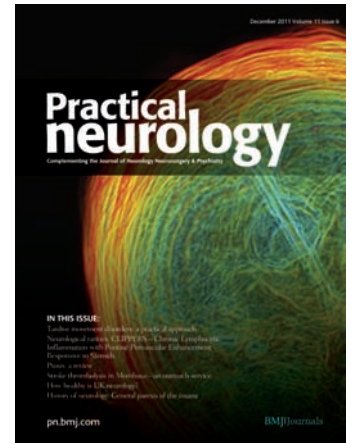

- 379** Neurologists 'suited and booted' and not a desk in sight
A Johnston
- 380** Who is really the world's best known neurologist?
A J Carson, M C Kiernan
- 381** The world's most famous neurologist? A rapid response
R M Bracewell

Carphology

- 382** Carphology by A Fo Ben

Neurological reflections

- 361** Simple dramatic research
G Fuller
- 365** Ignorant of ignorance?
G Fuller

Cover image Parkinson's disease. Fluorescent deconvolution micrograph of a section through a brain affected by Parkinson's disease. Neuron (nerve cell) nuclei are blue. The protein alpha-synuclein is red. It is thought that it is the accumulation of this protein that causes the progressive degeneration of the neurons that leads to the symptoms of Parkinson's disease.
